

PayNet Accelerates Malaysia's Financial Industry Talent Pipeline with Second Cohort of Cloud-Ready Graduates

The second cohort under the collaboration with Amazon Web Services (AWS) completed an intensive 14-week course to earn industry-recognised certifications and secure placements within Malaysia's financial services sector

Graduates of PayNet's Program Akar, powered by AWS re/Start, Cohort 2 at the Graduation Ceremony held on 10 December 2025.

KUALA LUMPUR, 10 December 2025 - Payments Network Malaysia Sdn Bhd (PayNet) today celebrated the graduation of 50 students of their Program Akar Powered by AWS re/Start digital upskilling initiative, marking another milestone in PayNet's mission to cultivate digitally skilled Malaysian talent for the financial services industry.

Program Akar, delivered through World Education Placement Services Sdn. Bhd. (WEPS), is PayNet's first flagship national talent development initiative that addresses Malaysia's digital skills gap designed to equip future leaders with globally recognised cloud skills for Malaysia's financial services industry. The programme equips participants with cloud technology and digital payments skills at no cost, supporting the growing talent needs of the financial sector.

This initiative aligns with the national call for stronger digital talent development, as emphasised by Prime Minister Datuk Seri Anwar Ibrahim, who highlighted that multinational companies require young talent equipped with skills for technological and digital transformation beyond the traditional academic syllabus.

"The future of the industry depends on a strong, digital-ready talent pipeline. PayNet's Program Akar is helping shape that future by equipping emerging talent with relevant skills,

hands-on industry experience, and the confidence to thrive in a tech-driven world,” said **Shafenaz Farouk, Chief People Officer, PayNet.**

The programme initially enrolled 100 students, with 50 forming the first pilot cohort at the Asia Pacific University of Technology & Innovation (APU). Financial sector organisations such as Bank Negara, Maybank, Public Bank, CIMB, and Bank Islam have expressed interest in exploring internship and job placement pathways for Akar graduates to support wider industry adoption.

PayNet is the lead architect of the programme, playing a central role in shaping the curriculum and ensuring that industry-relevant skills were fully integrated to meet the needs of Malaysia’s financial sector. Meanwhile, AWS complemented their efforts by providing training resources, cloud services, and technical expertise.

Participants underwent a 14-week training that covered foundational cloud skills and digital payments, including a two-day on-site training on values-driven development programme. Graduates were awarded the AWS re/Start Certificate of Completion, an AWS Cloud Practitioner certificate, a Digital Payments Certificate, and the Values-Driven Enrichment Programme Certificate of Completion, signifying readiness for industry roles.

“Cloud skills are fundamental to how Malaysia’s financial institutions run, innovate, and scale, and they now form the backbone for Malaysia’s next phase of AI-driven transformation. PayNet has taken a leadership role in recognising this shift and investing early in a talent pipeline that is not only cloud-ready but AI-ready. Through Program Akar Powered by AWS re/Start, participants gain the practical capabilities needed to contribute immediately to the financial services ecosystem, from modern digital payments to emerging AI applications. AWS is proud to deepen our collaboration with PayNet and will continue supporting the growth of a highly skilled Malaysian workforce that can accelerate the nation’s ambitions in digital finance and responsible AI innovation,” said **Hussein Mohd. Ali, Country Manager, AWS Malaysia.**

“Program Akar powered by AWS re/Start is more than a training initiative, it is a bridge that connects young Malaysians to real opportunity. At WEPS, we are proud to work alongside PayNet and AWS to guide students into the workforce with skills that are relevant, in-demand, and future-proof. Malaysia already has incredible talent, all they need is the right pathway. Program Akar gives them that pathway, and we are honoured to help them walk it.”

Mughilen Rathakrishnan, Chief Executive Officer, WEPS.

“With Cohort 2 delivering strong outcomes, PayNet is building solid momentum and remains committed to nurturing talent for the wider ecosystem. Through continuous collaboration with our partners across the financial sector, we are ensuring that Program Akar is aligned to industry needs and addresses critical talent gaps,” Shafenaz added.

Globally, the AWS re/Start programme operates in more than 60 countries, with 98 percent of graduates securing job interview opportunities. It is one of the initiatives that has helped AWS train over 31 million learners across 200 countries and territories through its free training programmes.
